PESTICIDES AND TOXIC
SUBSTANCES

MEMORANDUM

SUBJECT: Reregistration Eligibility Document (RED) for Allium sativum (Garlic; Case No. 4007)

FROM: Reto Engler, Ph.D.
Senior Science Advisor
Health Effects Division (H7509C) *R. D. Engler (for R.E.)*

TO: Bruce Sidwell, Section Chief
Accelerated Reregistration Branch
Special Review and Reregistration Division (H7508C)

THROUGH: Penelope Fenner-Crisp, Ph.D., Director
Health Effects Division (H7509C) *2/15/92*

ACTION REQUESTED: Allium sativum or garlic, has been selected as a candidate for the production of a Reregistration Eligibility Document (RED). SRRD requested that HED provide a position document with respect to the product identity and toxicology issues (SACB) and the potential for occupational and residential exposure (OREB) for the subject compound.

SACB CONCLUSION: All product identity/chemistry data requirements have been satisfied. All applicable toxicology data requirements have been waived for the subject compound. The potential risks, if any, to humans from both nondietary/dietary and occupational exposures are considered negligible because of the long history of use by humans as a food. Based on the lack of toxicological concerns OREB has no data or product labeling concerns.
